Python 7701P Replacement Remote Control - Viper 7701V

Brand: Python
Product Code: 7701P - 7701V
Stock: 8
FCC ID: EZSDEI7701
MPN: 7701P - 7701V
Location: Cleveland, OH

Price: $109.99

Short Description
Replace your discontinued **Python 7701P Responder SST 2-Way LCD remote control** with a **brand-new genuine Viper 7701V**. Compatible with select Python 950 / 4301P and 990 / 5301P systems. **FCC ID: EZSDEI7701.** The Viper 7701V is the actual remote shipped. **In Stock — $109.99.**

Description

Python 7701P Replacement Remote Control — Genuine Viper 7701V

Replace your discontinued **Python 7701P Responder SST 2-Way LCD remote control** with the **brand-new genuine Viper 7701V**. This replacement is intended for compatible Directed Electronics Python alarm and remote-start systems originally using the Python 7701P. **FCC ID: EZSDEI7701.**

PYTHON 7701P DISCONTINUED — GENUINE REPLACEMENT IN STOCK

The original Python 7701P remote is discontinued. **When you purchase this listing, we ship a brand-new, genuine Viper 7701V Responder SST 2-Way LCD remote control.** You will **not** receive a Python-branded 7701P.

Price: $109.99 — In Stock.

FCC ID: EZSDEI7701 Original 7701-series two-way LCD remote family.

GENUINE VIPER 7701V Brand-new replacement remote; one AAA battery included.

UP TO 1 MILE Manufacturer-advertised range under ideal conditions; actual range varies.

Compatible Python Systems

The Viper 7701V replaces the Python 7701P on compatible systems, including **Python 950 / 4301P** and **Python 990 / 5301P**, when equipped with the appropriate receiver. Related 7701-series applications include Clifford Matrix 20.5X / 4301X and 50.5X / 5301X, plus Viper 5500 / 4301V and 5900 / 5301V.

Important: The Python 7701P / Viper 7701V remote family is NOT interchangeable with Python 479P, Clifford 479X, or Viper 479V remotes. Similar appearance does not mean compatibility.

Specifications

Original remote	Python 7701P — discontinued

Advertised range	Up to one mile under ideal conditions
Battery	One AAA battery included
Belt clip	Not included
Condition	New
Price / Availability	$109.99 / In Stock

Programming and Compatibility

This replacement must be programmed to a compatible, functioning alarm or remote-start system. Verify the original remote model and the installed receiver or antenna before ordering. Compatibility is determined by the installed system, not the vehicle's year, make, or model.

For the current replacement remote under its Viper model number, see the Viper 7701V product page.

Access 1 Alarm & Audio

Purchase genuine replacement remote controls from Access 1 Alarm & Audio, an authorized Viper Diamond Dealer serving Cleveland and Northeast Ohio for over 20 years. For compatibility questions, call (216) 252-3000.

Programming Instructions

Viper 7701V Programming Instructions

Responder SST 2-Way LCD Remote Control - Directed Electronics Learn Routine

Follow these instructions to program your **Viper 7701V 2-Way LCD remote** to a compatible, functioning security or remote-start system.

Before beginning, locate the vehicle's **Valet/Program switch**. The switch must be connected to the **BLUE port** on the system's control unit.

1. **DOOR:** Open a vehicle door and leave it open.
2. **KEY:** Turn the ignition key to the **ON** position. Do not start the engine.
3. **CHOOSE:** Within **5 seconds**, press and release the **Valet/Program switch once** to select Channel 1 (Auto-Learn Standard Configuration).
4. **HOLD:** Press the Valet/Program switch **one more time and continue holding it**. The LED will flash once, and the siren will chirp once if connected. **Do not release the switch.**
5. **TRANSMIT:** While continuing to hold the Valet/Program switch, press the button on the **Viper 7701V remote** that you wish to assign. The system will chirp, if connected, to confirm that the remote was learned.
6. **RELEASE:** Release the Valet/Program switch and remove the ignition key.

PROGRAMMING CHANNEL REFERENCE

Channel 1: Auto-Learn Standard Configuration.

Channel 11: Delete All Transmitters.

Important: Do not select Channel 11 unless you intentionally want to erase all previously programmed remotes.

LOCK: Arms and locks the system.

UNLOCK: Disarms and unlocks the system.

AUX: Operates Channel 2.

SIREN / STAR: Panic function. Remote-start operation may vary depending on the installed system and configuration.

LOCK + UNLOCK / STAR together: Operates Channel 3 where supported.

P BUTTON ON BACK: Opens the transmitter programming menu. Refer to the system owner's guide for additional details.

IMPORTANT - NOT FOR 479V, 479X OR 479P

These programming instructions are specifically for the **Viper 7701V Responder SST** and compatible systems.

The visually similar Viper 479V, Clifford 479X and Python 479P remotes use an incompatible remote system. The 7701V cannot replace those models.

If you are unsure which security or remote-start system is installed, verify the system model and receiver before attempting programming.
