Brand: Alpine Car Audio

Product Code: DVR-C320R

Stock: In Stock

UPC: 793276084286

Custom Field 2 (EAN): 793276084286

MPN: DVR-C320R

Location: Cleveland, OH

Price: \$499.95

Short Description

Alpine's Premium 1080p HD Night Vision Dash Camera has the highest quality recording of accident footage and license plate capture so you can drive with confidence. Premium 1080P Dash Camera Recording

Description

Premium Front and Rear Night Vision Dash Camera Bundle

Alpine DVR-C320R

Protect your vehicle with Alpine's premium front-and-rear dash camera system featuring Full HD Night Vision recording, intelligent impact detection, built-in driver-assistance alerts, Wi-Fi and GPS.

\$499.95

Professional installation required.

Premium Protection in One Complete Camera System

The Alpine DVR-C320R combines front-and-rear surveillance with the essential equipment and connectivity needed for everyday driving and parking protection.

Front and rear 1080p cameras

Super Night Vision

Wide Dynamic Range

140-degree diagonal field of view

Built-in Wi-Fi

Built-in GPS

Driver-assistance alerts

Impact-triggered parking recording

32GB MicroSD card included

Universal mounting bracket included

1080p Full HD Night Vision Recording

The DVR-C320R records Full HD 1080p video at 30 frames per second with a 140-degree diagonal field of view, helping capture important details such as license plates, surrounding vehicles, road conditions and accident footage.

Wide Dynamic Range technology automatically adjusts exposure and white balance during sudden lighting changes, while Super Night Vision helps produce clearer recordings in darker driving and parking conditions.

Stay Alert on the Road

The DVR-C320R includes driver-assistance functions that provide audible alerts for changing conditions ahead.

Forward Collision Warning: Alerts the driver when the vehicle may be approaching another vehicle too closely.

Lane Departure Warning: Provides an alert when the vehicle begins moving outside its detected lane.

Front Vehicle Movement Warning: Alerts the driver when the vehicle ahead begins moving after traffic has stopped.

Driver-assistance features are supplemental alerts only and do not replace attentive driving or the vehicle's factory safety equipment.

Protection While Driving and Parked

The DVR-C320R records activity while the vehicle is being driven and can continue monitoring the vehicle after the ignition is turned off when properly installed and configured for Parking Mode.

If an impact is detected while parked, the system can preserve footage from approximately 10 seconds before and 10 seconds after the event, providing valuable context surrounding the incident.

Parking surveillance requires the appropriate permanent power connection and professional vehicle integration.

Front and Rear Camera Coverage

The DVR-C320R includes a primary front camera and a secondary camera for additional coverage. The secondary camera can be positioned to record through the rear window or monitor activity inside the passenger compartment.

The included universal mounting bracket supports a clean windshield installation, while professional camera placement helps provide useful viewing angles without unnecessarily obstructing the driver's view.

The front camera provides a 136-degree horizontal and 77-degree vertical viewing angle. The rear camera provides a 116-degree horizontal and 61-degree vertical viewing angle.

Integration with Compatible Alpine Receivers

The DVR-C320R features a universal RCA video output for connection to compatible Alpine receivers.

With a supported Alpine receiver and the proper connection, recordings can be viewed on the in-dash display, and select dash-camera controls and driver-assistance settings may be accessed through the Alpine interface.

Compatibility and available functions depend on the Alpine receiver and system configuration.

Built-In Wi-Fi, GPS and Alpine Recording Viewer

Built-in 802.11n 2.4GHz Wi-Fi allows a compatible smartphone to connect to the DVR-C320R through the Alpine Recording Viewer app. Users can access Live View, review recorded files and adjust supported recording, parking and driver-assistance settings.

Built-in GPS records location and speed data for supported playback and documentation.

The included 32GB MicroSD card provides recording storage, while the Alpine PC Viewer offers another way to review, download and preserve important footage.

Application and operating-system availability may change over time and is controlled by Alpine and the applicable app stores.

Free 2-Year Replacement Warranty

When the Alpine DVR-C320R is purchased from and professionally installed by Access 1 Alarm & Audio, it qualifies for our **FREE 2-Year Replacement Warranty**.

Access 1 also warrants our installation workmanship for as long as the original customer owns the vehicle.

Professional Installation by Access 1

A premium dash camera performs best when its cameras, wiring and parking-surveillance power connection are installed correctly. Our installation process can include:

- Proper front and rear camera positioning
- Concealed wiring routed with consideration for factory airbags and safety equipment
- Correct power integration for driving and parking recording
- Parking-mode and impact-sensitivity configuration
- Wi-Fi and Alpine Recording Viewer setup
- Camera-angle, memory-card and recording verification
- Compatible Alpine receiver integration when applicable
- Basic customer instruction before vehicle delivery

[Contact Access 1 for Installation](#) [View DVR Dash Cameras](#)

Vehicle-specific installation parts and professional labor are required and additional. Final installation pricing depends on the vehicle and requested integration.
