

# Alpine KTA-200M 400W Mono Amplifier

**Brand:** Alpine Car Audio

**Product Code:** KTA-200M

**Availability:** In Stock

**UPC:** 793276084088

**MPN:** KTA-200M

**Location:** Cleveland, Ohio

**Price: \$199.95**

## Short Description

The KTA-200M Mono Power Pack Amplifier produces 400-watts of Alpine's Exclusive Dynamic Peak Power for big subwoofer power in a small space.

## Description

The KTA-200M Mono Power Pack Amplifier produces 400-watts of Alpine's Exclusive Dynamic Peak Power for big subwoofer power in a small space.

## Features

- Compact Size Product Dimensions: 7" x 1.5" x 3.5"
- Alpine's Exclusive Dynamic Peak Power (DPP) Technology
- Remote Bass Knob ready with the RUX-KNOB.2
- PowerStack capable with the Alpine iLX-W650/iLX-W670
- Alpine's Class D Amplifier Circuit w/ Dynamic Peak Power (DPP)
- 200W x 1 RMS (2/4?, 14.4V, ?1% THD+N)
- 400W x 1 DPP (4?, 14.4V, ?1% THD+N)
- S/N >80dB (ref. 1W into 4?)
- RCA inputs (Low range=0.2-4V)
- Selectable Low Pass Crossovers

## A SIMPLE WAY TO ADD BASS

If you're craving the impact of bass in your sound system but don't have the room in your budget or vehicle for a traditional amplifier, start your journey to better sound with the compact KTA-200M. With the highest performance value on the market, this mono-power amp provides an easy upgrade path to add more bass to your sound system.

## BIG SOUND IN A SMALL PACKAGE

Utilizing Alpine's exclusive Dynamic Peak Power (DPP) technology, the 200-watt KTA-200M delivers bursts of power to meet the peak demands of your music effectively rising to 400-watts and then rolling back to maintain efficiency. The result is crisp, clean music at all volumes.

## Reliable Power Handling

New to the KTA-200M, a voltage adapting input circuit is included to maintain the maximum source signal level without clipping. This ensures that the KTA-200M can continue to produce powerful, clean bass even at higher volumes with

dynamic musical passages.

## PowerStack Capable

The KTA-200M utilizes Alpine's compact Power Pack design to fit in hidden areas like a glove box or behind a radio to optimize power and space in your vehicle. Mounted behind the iLX-W650 7-Inch Mech-Less Audio/Video Receiver, the KTA-200M becomes the newest PowerStack product, for an easy, hideaway bass solution that adds more power to the sound system while occupying the same depth as a traditional 2-DIN radio.

## Remote Bass Knob Ready

The KTA-200M has input capability to add an optional RUX-KNOB.2 Remote Bass Control Knob (sold separately). The remote bass knob controls the bass in your subwoofer by adjusting the gain on your amplifier for quick bass adjustments when needed.
