Short Description
Alpine Direct Fit Weather Resistant Sound System for 2011-2018 Jeep Wrangler JK Unlimited

Description
The Alpine PSS-22WRA is a weather-resistant, all-inclusive sound system for 2011-2018 Jeep Wrangler JK Unlimited models without factory-equipped amplified sound systems.

Looking for a premium sound system for your Jeep Wrangler JK? Look no further than the Alpine PSS-22WRA. Specifically designed for 2011-2018 Jeep Wrangler JK Unlimited models, this 1200-watt, 9-speaker sound system delivers outstanding sound performance both with the top on or off.

Don't worry about being caught in inclement weather with the top off, as the PSS-22WRA is IP55 rated to withstand rain, wind, and dust. The subwoofer uses rust-resistant hardware and can handle water from off-roading adventures or a quick rinse down.

Alpine’s exclusive Dynamic Peak Power (DPP) amplifier technology and 10-inch under-seat subwoofer enclosure deliver excellent sound performance that will turn heads. The

PSS-22WRA loads and disperses lower frequency sound from the passenger’s foot well area, maximizing bass extension throughout the Jeep for an exceptional audio experience.
