Price: $699.99

Short Description

2015-2018 Audi A3 smartphone remote start for $699.99 installed in Cleveland. Control by factory Audi key or smartphone. No OEM key sacrificed.

Description

2015–2018 Audi A3 Factory Key + Smartphone Remote Start

Add the convenience of remote start and smartphone control to your **2015–2018 Audi A3 equipped with a standard key and automatic transmission**. This professionally installed package gives you two convenient ways to remotely start your A3: use the **original Audi factory key** you already carry or control your vehicle directly from your **smartphone**.

For everyday operation, simply press the **LOCK button three times** on your factory Audi remote. When you need greater range, use the smartphone app for **virtually unlimited remote-start range** anywhere compatible cellular/data service is available.

$699.99 Professionally Installed

Complete vehicle-specific factory-key and smartphone remote-start solution for compatible 2015–2018 Audi A3 standard-key models.

Two Ways to Remote Start Your Audi A3

This package gives you both factory-key and smartphone control. For quick everyday use, press **LOCK three times** on your original Audi remote to start the vehicle. When you want significantly greater range, open the smartphone app and control the system through its cellular connection.

Virtually Unlimited Range From Your Smartphone

Smartphone control removes the normal range limitations of a traditional key fob. Because the system communicates through the cellular network, you can remotely start or control your Audi A3 from **virtually anywhere compatible cellular/data service is available**.

Whether your Audi is parked outside your home, across a large parking lot, at work, at the airport or miles away, your compatible smartphone provides convenient access to supported vehicle functions.

Smartphone Remote Start & Vehicle Control

The smartphone interface provides convenient connected-vehicle control directly from your compatible mobile device. Available features can include:

- **Remote engine start and stop**
- **Virtually unlimited remote-start range** through cellular connectivity
- **Remote door lock and unlock**
- Vehicle status information
- GPS vehicle location
- Vehicle battery information
- Push, SMS and email notifications
- Command and event history
- Multiple vehicle support
- Secure vehicle access sharing with additional users
- Additional GPS tracking and alert features with eligible service plans

No OEM Audi Key Sacrificed

Unlike remote-start installations that require permanently placing a factory key or transponder inside the vehicle, our vehicle-specific integration for this application is designed so that **no OEM Audi key is sacrificed.**

You keep **all of your factory Audi keys** while gaining both remote start and smartphone vehicle control.

Advanced Vehicle Integration

The system uses a vehicle-specific integration platform with the required Audi/VW immobilizer interface to communicate with the A3's factory electronics and immobilizer system. This provides a properly integrated remote-start solution specifically designed for the vehicle rather than a generic universal installation.

The integration platform provides CAN-bus vehicle communication, immobilizer integration, remote-start control and factory-remote integration while retaining normal operation of the Audi's original systems.

Package Features

- **Factory Audi key control** — press LOCK 3 times
- **Smartphone remote start and vehicle control**
- **Virtually unlimited range** with compatible cellular coverage
- Engine remote start and stop
- Vehicle-specific CAN-bus integration
- Factory immobilizer integration
- Factory door lock and unlock integration
- **No OEM Audi key sacrificed**
- Keep all of your factory Audi keys
- Designed for compatible automatic-transmission Audi A3 models
- Professionally installed and programmed
- Limited Lifetime Warranty

Professional Audi A3 Remote Start Installation in Cleveland

Modern Audi vehicles use sophisticated factory electronics, CAN networks and immobilizer systems. Proper remote-start installation requires more than simply connecting a universal remote starter.

Access 1 Alarm & Audio professionally installs and programs the complete system for your Audi A3. We have served Cleveland and Northeast Ohio for over 20 years, specializing in remote start, vehicle security, car audio and advanced automotive electronics.

Access 1 Alarm & Audio

Finishing Where the Factory Left Off
(216) 252-3000

Application is for compatible 2015–2018 Audi A3 vehicles equipped with a standard/key-start ignition and automatic transmission. Vehicle configuration and compatibility are verified before installation. Smartphone control requires compatible cellular/data service and an active connected-vehicle service plan. Actual coverage depends on cellular network availability. Some smartphone, GPS and notification features may depend on vehicle compatibility and selected service plan.
