**Brand:** Clifford
**Product Code:** 7351x-7254v
**Stock:** 4
**FCC ID:** EZSDEI7351
**MPN:** 7351x - 7254v
**Location:** Cleveland, OH

## Price: $109.99

**Short Description**
**DISCONTINUED:** The Clifford 7351X 2-way Responder LE remote has been replaced by the genuine **Viper 7254V**. Orders from this listing will receive the **7254V replacement remote**, not the original Clifford 7351X. **$109.99 with FREE U.S. shipping.**

**Description**

### Clifford 7351X 2-Way Responder LE Remote Control Replacement

The original **Clifford 7351X 2-way Responder LE remote control** has been discontinued and is no longer manufactured.

If you need a replacement for your Clifford 7351X, orders placed from this listing

receive the genuine **Viper 7254V**, the current replacement remote for compatible systems originally using the Clifford 7351X.

## Clifford 7351X Discontinued — Viper 7254V Replacement Ships

The **Clifford 7351X** has been discontinued and is no longer manufactured. The current replacement for compatible systems is the **Viper 7254V 2-way Responder LE remote control**.

The replacement provides the same type of 2-way Responder LE functionality when used with a compatible Clifford, Viper, Python or Automate remote-start/security system.

**IMPORTANT: This listing is for the replacement for the discontinued Clifford 7351X. Orders placed from this page will receive the genuine Viper 7254V shown in the product image. You will not receive an original Clifford 7351X.**

## CLIFFORD 7351X & OTHER RESPONDER LE REPLACEMENT MODELS

The genuine Viper 7254V is the replacement remote being shipped with this Clifford 7351X listing.

The Viper 7254V replaces the discontinued **Clifford 7351X** on compatible systems and also replaces select discontinued Viper, Python, Clifford and Automate Responder LE remotes.

## Clifford 7351X Replacement Remote Information

The remote supplied with this Clifford 7351X replacement listing is a brand-new, genuine **Viper 7254V 2-way Responder LE remote**.

The replacement features five rubberized buttons in a slim ergonomic housing and provides 2-way confirmation when used with a compatible remote-start or vehicle-security system.

Although the replacement remote carries the Viper name, it is compatible with select Clifford Matrix systems that originally used the **Clifford 7351X** and related Responder LE remotes.

# Clifford 7351X Compatibility Information

**If a Clifford 7351X previously operated your system, then you already know the Viper 7254V is compatible with that system.**

- If you are replacing a different model remote, compatibility is determined by the actual Clifford, Viper, Python or Automate remote-start/security system installed in the vehicle.
- On certain systems, compatibility can depend on the **Control Center / Antenna**.
- *** Models marked with an asterisk require a new antenna. Contact Access 1 Alarm & Audio to purchase the antenna.**
- If you are unsure which remote your system requires, contact Access 1 Alarm & Audio before ordering. We can help identify the correct replacement remote.

## Programming Instructions

# 7254V Programming Instructions

Responder LE 2-Way SuperCode Remote Control

The following Learn Routine is used to program this replacement transmitter to the system. Programming is performed using the button on the vehicle's windshield-mounted **Control Center / ANTENNA**.

1. Open a door.
2. Turn the ignition **ON**.
3. Press, release, and then press and hold the programming button on the **Control Center / Antenna**.
4. The Control Center LED flashes and the siren or horn sounds one time to confirm the system is prepared. Release the button and proceed to the remote-learning procedure below.
5. Press and hold the **FUNCTION button** until the transmit LED turns on, then release the button.
6. Press and hold the **REMOTE START button** until the transmit LED flashes **3 times**, then release the button.
7. Press the **LOCK button** until the siren or horn sounds to confirm the remote has been learned.
8. A sequence of chimes should sound from the remote to confirm successful pairing. If the chimes are not heard, make sure the system is still prepared for learning and repeat the remote-learning procedure.
