Price: $179.99

Short Description
Replace the discontinued **Clifford 7345X 2-Way LCD remote** with a genuine Viper remote-control package containing the **7347V 4th Generation 2-Way LCD remote** plus the **7147VS 1-Way security companion remote** for compatible Clifford Matrix systems. **$179.99 with FREE U.S. shipping.**

Description

Clifford 7345X Replacement - Viper 7347V + 7147VS Remote Bundle

Looking for a replacement for your discontinued **Clifford 7345X 2-Way LCD remote control**? This genuine Viper replacement bundle includes the **7347V 4th Generation 2-Way LCD remote** plus the **7147VS 1-Way security companion remote** for compatible Clifford Matrix security and remote-start systems.

Although the replacement remotes carry the **Viper** name, Viper and Clifford are Directed brands. These remotes use the compatible Directed remote-control platform required by systems that support the Clifford 7345X.

$179.99 FREE Shipping in the USA

CLIFFORD 7345X DISCONTINUED — REPLACEMENT BUNDLE AVAILABLE The products being sold and shipped are the **Genuine Viper 7347V 2-Way LCD Remote + Viper 7147VS 1-Way Companion Remote** . You will **NOT** receive the discontinued Clifford 7345X.

This package gives you two genuine Viper remote controls for a compatible Clifford Matrix security or remote-start system.

Viper 7347V 4th Generation
2-Way 5-Button LCD Remote
Up to 1/4-Mile Rated Range

FCC ID: EZS7347V

Viper 7147VS 1-Way 5-Button Security Remote
Companion / Secondary Remote
Genuine Viper Remote Control

Why Do Viper Remotes Replace My Clifford 7345X?

Clifford and Viper security and remote-start products are part of the Directed product family, and compatible systems shared remote-control technology across several Directed brands.

Because the original **Clifford 7345X** has been discontinued, the newer **Viper 7347V** provides the replacement 2-way LCD remote for compatible Clifford systems. This package also includes the **Viper 7147VS 1-way companion remote**, giving you a second remote for the system.

You do not need a remote with the Clifford name printed on it for a compatible Clifford system to recognize the replacement.

The remotes you receive are **brand-new genuine Viper remote controls** from the original manufacturer — not aftermarket reproductions, used remotes or reprogrammed returns.

7347V Replacement Remote Compatibility

In addition to replacing the **Clifford 7345X**, the Viper 7347V can replace several earlier

or discontinued 2-way LCD remote controls when used with a compatible system and receiver / Control Center:

VIPER 489V 7341V 7345V
PYTHON 489P 7341P

IMPORTANT COMPATIBILITY INFORMATION:

If a **Clifford 7345X previously operated your system**, then you already know the Viper 7347V is compatible with that system. This bundle adds the Viper 7147VS as the 1-way companion remote.

If you are purchasing this bundle to replace a different remote model, compatibility is determined by the actual security / remote-start system and receiver / Control Center

installed in the vehicle.

Remote-control compatibility is **not determined by the vehicle's year, make or model**. Verify your original remote model and installed system if you are unsure before ordering.

Programming Instructions

Viper 7345V Remote Control Programming Instructions

The **Viper 7345V** must be paired to the security or remote-start system installed in the vehicle before it can be used.

The correct programming procedure depends on whether your installed system is a **Security + Remote Start system** or a **Security Only system**.

IMPORTANT — LOCATE YOUR PROGRAMMING BUTTON FIRST

Depending on the age and configuration of your system, the programming button may be located in one of two places:

- **Separate Valet / Program Switch:** Older installations may have a separate small push-button switch hidden underneath the driver's side dashboard.
- **Control Center / Antenna:** Other systems use the programming button incorporated into the windshield-mounted Control Center / Antenna.

Both buttons serve the same programming purpose in the routines below. Use whichever programming button is installed with your system.

1. **Door:** Open a vehicle door and leave it open.
2. **Key:** Turn the ignition key to the **ON** position. Do not start the vehicle.
3. **Choose:** Within five seconds, press and release the **Valet / Program button or Control Center / Antenna button one time**.
4. **Hold:** Within five seconds, press the same programming button one more time and **continue holding it**. The LED will flash one time and the siren will chirp to confirm entry into remote programming. **Do not release the button.**
5. **Transmit:** While continuing to hold the programming button, press the **LOCK button** on the Viper 7345V. The siren will chirp to confirm that the remote has been programmed.
6. **Release:** Release the programming button and turn the ignition key to **OFF**.

1. **Door:** Open a vehicle door and leave it open.
2. **Key:** Turn the ignition key to the **ON** position. Do not start the vehicle.
3. **Choose:** Within five seconds, press and release the **Valet / Program button or Control Center / Antenna button seven times**.
4. **Hold:** Press the same programming button one more time and **continue holding it**. The LED will flash seven times and the siren will chirp to confirm the selected programming channel. **Do not release the button.**
5. **Transmit:** While continuing to hold the programming button, press the **LOCK**

button on the Viper 7345V. The unit will chirp to confirm that the remote has been paired to the receiver.

6. **Release:** Release the programming button and turn the ignition key to **OFF**.

NOTE: If the system does not enter programming mode, first verify that you are using the correct programming button for your installation. Some vehicles have the **Valet / Program switch hidden underneath the dashboard**, while others use the button on the **windshield-mounted Control Center / Antenna**.

Programming Complete

After programming is complete, turn the ignition OFF and test the Viper 7345V by locking and unlocking the system. A properly paired 2-way remote should provide confirmation from the compatible system.
