7642X

Brand: Clifford
Product Code: 7642X - 7701V
Stock: 6
FCC ID: EZSDEI7642
MPN: 7642X - 7701V
Location: Cleveland, OH

Price: $109.99

Short Description
The original Clifford 7642X 1-Way SST companion remote has been discontinued, along with the Viper 7642V, Python 7642P and Directed 7642T. No new one-way replacement remains available. **When you order this listing, you receive one brand-new genuine Viper 7701V Responder SST 2-Way LCD remote control** for compatible systems. Includes one AAA battery. Programming required.

Description

Clifford 7642X Replacement Remote Control – Genuine Viper 7701V

The original **Clifford 7642X 1-Way SST 4-Button Companion Remote Control** has been discontinued. The equivalent Viper 7642V, Python 7642P and Directed 7642T one-way companion transmitters are also discontinued.

For compatible Directed Electronics security and remote-start systems, the remaining replacement option is the **genuine Viper 7701V Responder SST**

2-Way LCD remote control.

$109.99 – IN STOCK Brand-New Genuine Viper 7701V Responder SST 2-Way LCD Remote

Clifford 7642X Discontinued – Viper 7701V Ships Instead

The original **Clifford 7642X** and equivalent **Viper 7642V, Python 7642P and Directed 7642T** one-way SST companion remotes have all been discontinued. No new one-way companion remote is available for these systems.

When you purchase this listing, you receive one brand-new genuine Viper 7701V Responder SST 2-Way LCD remote control, NOT the discontinued Clifford 7642X.

Included: One genuine Viper 7701V remote control and one AAA battery. **Belt clip not included.** Programming is required.

GENUINE VIPER Original Directed Electronics remote

2-WAY LCD Responder SST communication

UP TO 1 MILE Advertised ideal-condition range

IN STOCK New Viper 7701V ships

Discontinued 7642-Series Companion Remotes

These one-way SST companion transmitters were offered under different Directed Electronics brands for compatible security and remote-start systems. All four models have been discontinued.

CLIFFORD 7642X Discontinued
VIPER 7642V Discontinued
PYTHON 7642P Discontinued
DIRECTED 7642T Discontinued

Clifford 7642X / Viper 7701V System Compatibility

The original 7642-series one-way companion remotes and 7701-series two-way LCD remotes were used with select Directed Electronics vehicle security and remote-start systems. Compatibility depends on the installed system and antenna/receiver.

CLIFFORD MATRIX

- 20.5X / 4301X
- 50.5X / 5301X

Original 1-Way: 7642X / 7642T
2-Way LCD: 7701X / 7701V

VIPER

- 5500 / 4301V
- 5900 / 5301V

Original 1-Way: 7642V / 7642T
2-Way LCD: 7701V

PYTHON

- 950 / 4301P
- 990 / 5301P

Original 1-Way: 7642P / 7642T
2-Way LCD: 7701P / 7701V

Important – Original 1-Way vs. Replacement 2-Way

The Clifford 7642X was a one-way SST companion transmitter. The Viper 7701V is a **2-Way Responder SST LCD remote** that provides visual confirmation of supported vehicle functions.

The Viper 7701V is the remaining replacement option for compatible systems. It is not a one-way remote. The original Clifford 7701X and Python 7701P two-way LCD transmitters are also discontinued.

STOP – Not Compatible with 479-Series Remotes

The Viper 7701V will NOT replace Clifford 479X, Viper 479V or Python 479P.

These older remotes use a different transmitter system. Do not purchase this listing as a replacement for a 479-series remote. Also not compatible with Venom SST systems.

Product Specifications

Original Model: Clifford 7642X
Remote Shipped: Viper 7701V
SKU: 7642X-7701V
FCC ID: EZSDEI7701

Technology: Responder SST 2-Way LCD

Range: Up to 1 mile (ideal conditions)

Battery: One AAA included

Belt Clip: Not included

Programming and Receiver Requirements

The replacement Viper 7701V must be programmed to a compatible, functioning Directed Electronics security or remote-start system before use.

Check your installed Clifford Matrix system and antenna/receiver before ordering. Refer to the separate Programming Instructions tab for pairing information.

Important: This listing includes the Viper 7701V remote control only. The vehicle must already have a compatible, functioning control unit and antenna/receiver installed.

Programming Instructions

Viper 7701V Programming Instructions

Responder SST 2-Way LCD Remote Control - Directed Electronics Learn Routine

Follow these instructions to program your **Viper 7701V 2-Way LCD remote** to a compatible, functioning security or remote-start system.

Before beginning, locate the vehicle's **Valet/Program switch**. The switch must be connected to the **BLUE port** on the system's control unit.

1. **DOOR:** Open a vehicle door and leave it open.
2. **KEY:** Turn the ignition key to the **ON** position. Do not start the engine.
3. **CHOOSE:** Within **5 seconds**, press and release the **Valet/Program switch once** to select Channel 1 (Auto-Learn Standard Configuration).
4. **HOLD:** Press the Valet/Program switch **one more time and continue holding it**. The LED will flash once, and the siren will chirp once if connected. **Do not release the switch.**
5. **TRANSMIT:** While continuing to hold the Valet/Program switch, press the button on the **Viper 7701V remote** that you wish to assign. The system will chirp, if connected, to confirm that the remote was learned.
6. **RELEASE:** Release the Valet/Program switch and remove the ignition key.

PROGRAMMING CHANNEL REFERENCE

Channel 1: Auto-Learn Standard Configuration.

Channel 11: Delete All Transmitters.

Important: Do not select Channel 11 unless you intentionally want to erase all previously programmed remotes.

LOCK: Arms and locks the system.

UNLOCK: Disarms and unlocks the system.

AUX: Operates Channel 2.

SIREN / STAR: Panic function. Remote-start operation may vary depending on the installed system and configuration.

LOCK + UNLOCK / STAR together: Operates Channel 3 where supported.

P BUTTON ON BACK: Opens the transmitter programming menu. Refer to the system owner's guide for additional details.

IMPORTANT - NOT FOR 479V, 479X OR 479P

These programming instructions are specifically for the **Viper 7701V Responder SST** and compatible systems.

The visually similar Viper 479V, Clifford 479X and Python 479P remotes use an incompatible remote system. The 7701V cannot replace those models.

If you are unsure which security or remote-start system is installed, verify the system model and receiver before attempting programming.
