Short Description

VOXX CARLINK ASCL7 smartphone remote start and GPS control module. Start your compatible remote starter, lock/unlock doors and locate your vehicle from your phone. Includes the first year of Premium service. Professional installation available at Access 1 Alarm & Audio in Cleveland, Ohio.

Description

VOXX CARLINK 7 | ASCL7

The **VOXX CARLINK ASCL7** is an advanced cellular-connected telematics module that brings convenient vehicle control to your smartphone. Start or stop your compatible remote starter, lock or unlock your doors, check vehicle status and locate your vehicle using the CARLINK 7 app.

Whether you're at home, at work or traveling, CARLINK 7 helps you stay connected to your vehicle wherever supported cellular service is available. The ASCL7 supports LTE-M cellular connectivity and works with a wide variety of compatible remote start platforms.

Smartphone Remote Start

Start and stop a compatible remote starter using your phone.

GPS Vehicle Location

Find your vehicle and view its location using the CARLINK app.

Vehicle Status

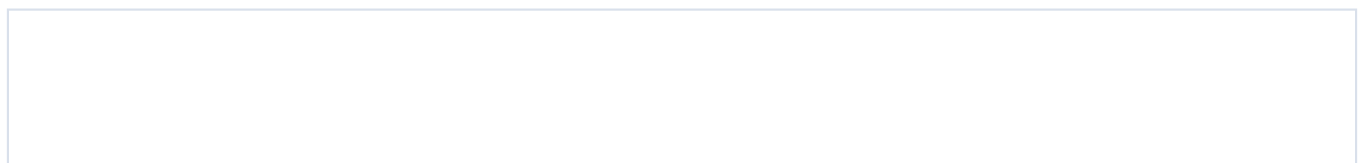

Access available vehicle status, battery and notification features.

CARLINK 7 Features

- Smartphone remote start and stop with compatible remote start hardware
- Remote door lock and unlock on supported vehicles
- Trunk or hatch release where supported
- Instant GPS vehicle location and map directions to your vehicle
- Vehicle battery voltage and remote starter status
- Available push, text and email notifications
- Customizable vehicle image and app control layout
- Multiple vehicles under one account and vehicle access sharing
- Supports LTE-M cellular networks
- Advanced GPS monitoring available through Premium Plus

Available functions depend on the vehicle, connected remote start or security equipment, installation configuration and active service plan.

CARLINK 7 Service Plans

First Year Included

Includes supported smartphone vehicle controls, GPS location, vehicle status and account-sharing features.

Renewal: \$49.95 after the first year.

Advanced GPS Features

Adds geofencing, vehicle movement alerts, trip history and route replay, excessive speed alerts and curfew monitoring.

Renewal: \$99.95. Available as an in-app upgrade.

Includes a 30-day Premium Plus trial. Subscription features and pricing are subject to change according to the service provider.

Compatible Remote Start Systems

CARLINK ASCL7 integrates with supported aftermarket remote start and security systems. VOXX specifically identifies compatible **FlashLogic, Prestige and Pursuit** products with telematics data ports. The manufacturer's installation guide also documents configurations for selected **iDataStart, Compustar, Directed, Fortin, Omega** and other systems.

Compatibility must be verified by Access 1 Alarm & Audio before installation.

Additional wiring harnesses, programming, interface modules or remote start equipment may be required.

Important: Smartphone Control Module

The ASCL7 is not a complete remote start system. Remote engine starting requires a compatible installed remote starter. The ASCL7 can also be configured for certain standalone GPS functions without remote start capability.

Professional Installation in Cleveland, Ohio

Access 1 Alarm & Audio provides professional CARLINK installation, system configuration and customer setup for compatible vehicles. We'll determine the appropriate integration method and help get your smartphone connected to your vehicle.

Ready to Control Your Vehicle From Your Phone?

OUR WARRANTY

Access 1 Alarm & Audio provides to the ORIGINAL owner a lifetime warranty on the installed system and includes the Control Module (brain), Antenna, Program Switch. LED and labor.

NOTE: The lifetime warranty DOES NOT include remote controls, which are covered by a 1-year warranty against defects.

NOTE: Disconnecting or modifying the wiring by anyone other than Access 1 Alarm & Audio VOIDS the warranty.

NOTE: If technology moves on and your system is obsolete due to the country's infrastructure progressing, we can't warranty the system. As what happened with the 2G cellular network.
