

Factory Car Alarm Digital Tilt Sensor Upgrade – Installed

Brand: Directed

Product Code: 507M-FACTORY-INST

Stock: 4

MPN: 507M-FACTORY-INST

Location: Cleveland, OH

Price: \$229.99

Short Description

Add digital tilt detection to your compatible factory car alarm while continuing to use your original factory key fob. Helps protect against wheel theft, vehicle jacking and unauthorized towing. Includes Directed 507M sensor and professional installation at Access 1 Alarm & Audio in Cleveland, Ohio. \$229.99 parts and labor installed. Vehicle compatibility verification required.

Description

FACTORY ALARM SECURITY UPGRADE

Many factory car alarms monitor doors, the hood and other security inputs but may not detect when a vehicle is being lifted or tilted. The **Directed 507M Digital Tilt Sensor**

can add vehicle angle detection to a compatible factory alarm system, helping identify potential wheel theft, vehicle jacking and unauthorized towing attempts.

At **Access 1 Alarm & Audio**, we professionally install and integrate the sensor with compatible factory vehicle security systems. Continue using your **original factory key fob** to arm and disarm your existing alarm, with added digital tilt detection while the system is armed.

Wheel Theft & Towing Detection

Monitors changes in vehicle angle associated with lifting, jacking and towing.

Keep Your Factory Remote

Continue using your original key fob on compatible factory alarm systems.

Professional Integration

Installed, configured and tested by experienced automotive security technicians.

What's Included?

- Directed Electronics 507M digital tilt sensor
- Professional installation and integration with a compatible factory alarm
- Sensor configuration and functional testing
- Continued operation using your original factory key fob

PARTS & LABOR INCLUDED

How Digital Tilt Detection Works

When the factory alarm is armed, the Directed 507M establishes a reference for the vehicle's current parking angle. The sensor then monitors changes in vehicle position that may indicate someone is lifting the vehicle to remove its wheels or attempting to tow it.

When a qualifying tilt condition is detected, the sensor provides a trigger signal to the connected security system. A compatible factory alarm can respond by activating its horn or other available alarm outputs. Actual response depends on the vehicle and the integration method.

Factory Alarm Compatibility

The 507M is an accessory sensor, not a complete alarm system. Your vehicle must have a compatible factory alarm or security interface capable of responding to the sensor's trigger signal. Not every factory alarm supports this upgrade.

Our technicians will verify your vehicle's security system before installation. Digital tilt detection supplements existing alarm protection but does not independently prevent unauthorized unlocking, key programming or vehicle starting.

Want More Independent Vehicle Security?

Factory key fob-controlled upgrades rely on compatible factory security functions. For additional protection independent of factory disarming commands, ask us about a dedicated aftermarket alarm with its own remote control and available starter-disable features.

Professional Installation & Warranty

The Directed 507M includes a one-year manufacturer warranty against defects in materials and workmanship. Professional installation by Access 1 Alarm & Audio includes our lifetime labor warranty for the original vehicle owner, subject to warranty terms.
