

Viper DS4 Factory Key Fob Add-On Car Alarm System – Installed

Brand: Directed

Product Code: DS4-FACTORY-ALARM-INST

Stock: 4

MPN: DS4-FACTORY-ALARM-INST

Location: Cleveland, OH

Price: \$399.99

Short Description

Upgrade factory keyless entry with a complete Viper DS4 add-on car alarm system. Keep using your original factory key fobs while adding door monitoring, shock and tilt detection, and an audible siren. Optional starter-disable protection is available. Ideal for compatible vehicles with factory keyless entry but limited or no alarm features. Professionally installed at Access 1 Alarm & Audio in Cleveland, Ohio, starting at \$399.99.

Description

COMPLETE FACTORY KEY FOB SECURITY UPGRADE

Does your vehicle have factory keyless entry but little or no factory alarm protection?

Many vehicles allow you to lock and unlock the doors using the original key fob without providing comprehensive intrusion, impact or vehicle-lifting detection.

The **Viper DS4 Factory Key Fob Add-On Alarm System** upgrades compatible vehicles with a professionally integrated security system that monitors door activity and adds **shock detection, digital tilt protection and an audible alarm siren**. Best of all, you continue using your **original factory key fobs** to control the system.

Complete Alarm Protection

Door monitoring, impact detection, vehicle tilt monitoring and an audible siren.

Factory Key Fob Control

Arm and disarm the alarm using your existing factory remote on compatible vehicles.

Professional Integration

Viper DS4 system installed, configured and tested for your specific vehicle.

Security Features & Protection

- **Door Monitoring:** Helps detect unauthorized door opening while the alarm is armed.
- **Shock & Impact Detection:** Monitors qualifying impacts to the vehicle through the installed shock sensor.
- **Digital Tilt Detection:** Helps detect changes in vehicle angle associated with wheel theft, vehicle jacking and towing attempts.
- **Audible Alarm Siren:** Sounds when a connected security input triggers the armed alarm.
- **Factory Key Fob Operation:** Convenient arming and disarming through compatible factory lock and unlock commands.
- **Optional Starter Disable:** Additional starter-inhibit protection may be available for compatible vehicles at extra cost.

How the Viper DS4 Add-On Alarm Works

When you lock your vehicle using the original factory key fob, the Viper security system arms through its compatible vehicle interface. While armed, the system monitors connected security inputs, including doors and installed impact and tilt sensors.

If an alarm condition is detected, the Viper system can activate its dedicated siren to alert people nearby. When you return, use your original factory key fob to unlock the vehicle and disarm the system through the supported factory control interface.

This provides a familiar, convenient way to operate a complete aftermarket alarm without requiring a separate alarm remote for normal use.

What's Included?

- Viper DS4 security system and compatible vehicle integration
- Door intrusion monitoring using available vehicle inputs
- Shock and impact detection sensor
- Digital tilt detection sensor
- Dedicated audible alarm siren
- Factory key fob-controlled arming and disarming
- Professional installation, configuration and system testing

COMPLETE SECURITY SYSTEM - PARTS & LABOR INCLUDED

Optional Starter Kill / Immobilizer Upgrade

For customers who want another layer of protection, we can evaluate adding a starter-disable feature to a compatible installation. This helps inhibit normal engine starting when the appropriate security conditions are met.

For even more independent protection, ask about our separately controlled hidden starter kill switch options, including available custom authorization methods. These can provide an additional authorization step beyond normal factory key fob operation.

Factory Vehicle Compatibility

The Viper DS4 system requires compatible vehicle electronics and integration support. Factory key fob arming, disarming, door monitoring and optional security features vary by vehicle make, model, year and equipment.

Our technicians will verify compatibility and determine the appropriate installation configuration before proceeding.

Understanding Factory Key Fob-Controlled Security

This alarm is designed to work with compatible factory key fob commands for convenient arming and disarming. Because its disarming operation depends on factory vehicle communications, a thief who successfully manipulates the vehicle's electronic network or generates an accepted factory unlock command may also be able to disarm the alarm.

For customers seeking protection that does not rely on factory unlock commands, we also offer independently controlled aftermarket alarm systems and separate hidden starter-disable solutions. Our technicians can help you choose the appropriate level of security for your vehicle.

Professional Installation & Warranty

Every Viper DS4 security installation is performed by Access 1 Alarm & Audio's experienced mobile electronics technicians. Our professional installations include a lifetime labor warranty for the original vehicle owner, subject to warranty terms. Applicable product warranty coverage is explained at the time of installation.
