Short Description

Simply the best DVR camera in the world! Need a reliable witness to an accident or a Police encounter? Then this is the unit for you! Don't be fooled by the cheap imitations that don't work.

Description

Redefining the Dashcam

The DR900S Series redefines expectations for dashcam video fidelity and storage efficiency.

With its 8-megapixel CMOS sensor in the main camera, the DR900S-2CH captures 4K Ultra High Definition video—four times as many pixels as Full HD. The rear Full HD Sony STARVIS™ image sensor ensures best image quality under any light. Thanks to the H.265 (HEVC) compression, your videos look better and file size is kept as small as ever.

Specification
